(a) Four calculations, one curve
production (32, 12)
independent QuTiP BDF
tighter tolerance
larger truncation (40, 14)
Re⟨b⟩₊ / b₀
t (μs)
(b) Largest difference, parts per million
independent QuTiP BDF: max 0.13 ppm
tighter tolerance: max 0.01 ppm
larger truncation (40, 14): max 0.31 ppm
|Δ⟨b⟩| / b₀ (ppm)
t (μs)
